

Nidhi Yadav

Data Scientist

nidhiyadav99927@gmail.com | 7016935828 | Ahmedabad, India | linkedin.com/in/nidhi-yadav207 | github.com/nidhi-yadav20799

PROFILE

Data Science graduate focused on building intelligent systems through machine learning, statistical modeling, and data-driven analysis. Skilled in transforming raw datasets into actionable insights through data preparation, feature engineering, and algorithm implementation using Python-based tools.

EDUCATION

Bachelor of Science (B.Sc.) in Data Science, Silver Oak University

07/2023 – 08/2026 | Ahmedabad, India

CGPA: **8.91/ 10**

Relevant Areas: Statistical Methods, Predictive Modeling, Natural Language Processing, Data Mining, Artificial Intelligence

SKILLS

Programming & Query Languages: Python, SQL, R

Machine Learning Techniques: Classification, Clustering, **Supervised Learning**, Feature Engineering, Predictive Modeling, NLP

Data Processing & Analysis: Exploratory Investigation, Dataset Transformation, Statistical Reasoning, Insight Discovery

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib, Seaborn

Platforms & Development Tools: Power BI, Tableau, Jupyter Notebook, Google Colab, VS Code, Git (Basic), RStudio

AI / Generative AI: Basic exposure to NLP, text generation, and AI-based solutions

PROJECTS

Retail Insights – E-Commerce Sales Analysis,

05/2026 – 06/2026

Sales & Profit Trend Analysis using Python and Power BI

- Analyzed 51,000+ sales records (2011–2014) from the Superstore dataset using Python and Pandas to identify sales and profit trends.
- Conducted regional profit analysis and evaluated the impact of discounts on overall profitability.
- Built an interactive Power BI dashboard highlighting top and bottom performing products.
- Delivered actionable insights to support data-driven business decision-making.

Real-Time Indian Sign Language Recognition Using Deep Learning (Group Project),

02/2026 – 03/2026

System Name: SilenEko

- Built a real-time hand gesture recognition system to classify Indian Sign Language alphabets.
- Used **TensorFlow** and **MobileNetV2** for transfer learning-based image classification.
- Implemented image preprocessing and gesture capture using **OpenCV**.
- Integrated **MediaPipe** for hand detection and cropping to improve prediction accuracy.
- Developed a pipeline to capture hand gestures via webcam, preprocess images, and output predicted alphabets.

Fake News Detection using Machine Learning, NLP-Based Text Classification

12/2025 – 01/2026

- Built an NLP-based classification model to detect misleading news articles.
- Applied **text preprocessing**, **TF-IDF feature extraction**, and **ML classifiers** using Python libraries
- Evaluated model performance using predictive metrics for improved accuracy.

PROFESSIONAL EXPERIENCE

Technmicra IT Solutions, Academic Intern in Generative AI

11/2025 – 12/2025 | Ahmedabad, India

- Completed a 25-day academic internship focused on the fundamentals of Generative AI and Natural Language Processing.
- Learned key concepts including Prompt Engineering, Large Language Models (LLMs), and AI-driven content generation.
- Studied how generative AI technologies are applied in real-world business and data-driven environments.
- Observed workflows related to AI model usage, dataset understanding, and AI-based problem solving.

CERTIFICATES

AI Career for Women – Edunet Foundation

Training program focused on Artificial Intelligence fundamentals and industry applications. | 2026

Deloitte Australia – Data Analytics Job Simulation

Forage | Data Analytics, Tableau & Excel | 2026

Deep Learning

NPTEL (IIT Ropar), **Elite**, 2025

R Programming for Beginners

Simplilearn, 2025

Machine Learning Using Python

Simplilearn, 2025

Business Analytics with Excel

Simplilearn (Microsoft), 2025

SOFT SKILLS

Active Listening

Adaptability
Teamwork
